

ExBin-A... binary, switching module for switching sensors

ExBin - A1
ExBin - A2

Subject to change!

Electrical, explosion proof switching modules for switching sensors 24 VAC/DC supply voltage, output potential free switching contact EC type-approved in acc. with ATEX directive 2014/34/EU for zone 1, 2, 21, 22

Compact. Easy installation. Universal. Cost effective. Safe.

Туре	Channel	Supply	Output switch	Max. ratings	Wiring
ExBin - A1	1×	24 VAC/DC	pot. free contact	250 V, 0.1A / 30 V, 0.5 A	SB 1.0 / SB 4.0
ExBin - A2	2 ×	24 VAC/DC	pot. free contact	250 V, 0.1A / 30 V, 0.5 A	SB 2.0 / SB 4.0

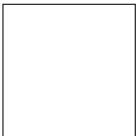

Product views/Application

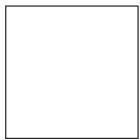

ExBin-A1

ExBin-A2

Description

The new ExBin-A... switching module generation (avaible in a 1- and 2-channel version) is a revolution for switching sensors in HVAC systems, in chemical, pharmaceutical, industrial and Offshore-/Onshore plants, for use in hazardous locations zone 1, 2 (gas) and zone 21, 22 (dust). Highest protection class (ATEX) and IP66 protection, small dimension, universal functions and technical data guarantee safe operation even under difficult environmental conditions.

Highlights

- For all type of gas, mixtures, vapours and dust for use in zone 1, 2, 21 and 22
- No addionally Ex-i module required
- ▶ Only intrinsically safe wiring/installation between switching module and sensor required
- ▶ No intrinsically safe wiring/installation and no space in the panel required
- ▶ Integrated Ex-e junction box
- ► Power supply 24 VAC/DC
- Output potential free switching contact
- ► Display for switching state indication
- Fix starting bypass time for two channels
- Compact design and small dimension (L × B × H = 177 × 107 × 66 mm)
- Robust aluminium housing in protection class IP66
- ▶ Down to -20°C ambient temperature applicable

IACHH	ical data	ExBin - A.	

Power supply 24 VAC/DC ± 20% (19,2...28,8 VAC/DC) 50...60 Hz

Current, power consumption 150 mA, ~ 4 W, internal fuse 500 mAT, without bracket, not removable

Galvanic isolation supply – output 1,5 kV

Electrical connectionterminals $0,14...2,5 \text{ mm}^2$ at integrated Ex e junction boxCable entry $2 \times \text{M16} \times 1,5 \text{ Ex e approved, cable diameter} \sim \emptyset 5...10 \text{ mm}$

Protection class Class I (grounded)

 Display
 Actual value indication via LEDs

 Housing protection
 IP66 in acc. to IEC 60529

 Housing material
 aluminium casting, coated

Dimension / weight $L \times W \times H = 177 \times 107 \times 66 \text{ mm} / \sim 950 \text{ g}$ Ambient temperature/-humidity -20...+50 °C / 0...95 °R, non condensed

Maintenance must be complied with regional standards, rules and regulations

Sensor circuit IS circuit (data see tables)

Start delay 5 sec.
Starting bypass time (AUB) 120 sec. (fix)

Output switch potential free switching contact

Ratings load max. 0,5 A @ 30 VAC/DC / 0,1 A @ 250 VAC / 0,1 A @ 220 VDC

Ratings load min. 10 mW / 0.1 V / 1 mA

Mechanical life 10×10^6 Electrical life (rated load) 100×10^3

Wiring diagram (SB) SB 1.0, SB 2.0, SB 4.0 Installation sensor / tubing in Ex-area zone 1, 2, 21, 22

Approbations

ATEX directive 2014/34/EU

EC type-approved EPS 14 ATEX 1 657

Approval for gas II 2 (1) G Ex e mb [ia Ga] IIC T6...T4 Gb

Approval for dust II 2 (1) D Ex tb [ia Da] IIIC T80°C...T130°C Db IP66

CE identification CE № 0158

EMC directive 2014/30/EU

Low voltage directive 2014/35/EU

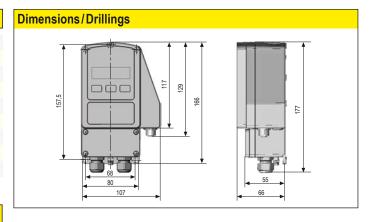

Enclosure protection IP66 in acc. to EN 60529

Protection Class I (grounded) over voltage categorie II acc. to EN 61010-1

Special solutions and accessories

...-CT Types in aluminium housing with seawater resistant coating,
parts nickel-plated
...-VA Types in stainless steel housing, parts nickel-plated
MKR Mounting bracket for round ducts up to Ø 600 mm

Kit-S8-CBR 2 cable glands M16 × 1,5 mm, Ex-e, brass nickel-plated, for cable Ø 5...10 mm

Electrical connection

ExBin-A... transducers are equipped with a 24 VAC/DC power supply. The supply has to be connected at terminal 1 (-/~) and 2 (+/~). The electrical wiring must be realized via integrated Ex-e junction box in acc. to ATEX. Type of protection for the terminals is "Ex-e". The starting bypass delay can be activated by a short circuit of terminal 2 and teminal 3 (AUB1) or terminal 2 and terminal 4 (AUB2). An active bypass delay is indicated with green blinking LEDs.

Attention: Do not open covers when circuits alive!

Connect the wires max. $0.75 \ \text{mm}^2$ are acc. to diagram. After than close threat tighten The cable diameter has to be between 6-8 mm.

Connectable sensors are:

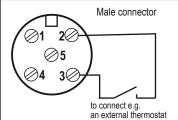

TBR-2... / TBK... / TBT... thermostats, FBR-2G / FBK-2G humiditystats

DBK... differential pressure switches, WFBK-2G airflow switch TBK-FR-2G frost protection

Wiring Ex-i output on ExBin-A switching module

Terminals

SB 4.0

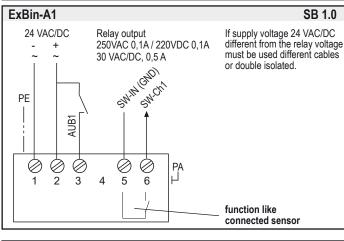

Values intrinsically safe (IS) for passive sensors

Uo = 7,14 Vlo = 8 mAPo = 15 mW Ci = 0

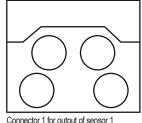

Co (IIC) = 5 mH = 0 Lo ($\hat{I}IC$) = 1,5 μ F

Open the plug, connect the wires. Use terminal acc. to diagram, close tighten. Unused connectors must be covered by a protective cap against damage and dirt

Important information for installation and operation

Installation, Commisioning, Maintenance

The cable has to be drawn through the cable gland. After electrical connection the cable gland must be fixed tighten. IP66 must be fulfilled. In acc. with operation ExBin switches are maintenance free. Nevertheless maintenance must comply with regional standards, rules and regulations. The sensors must not be opened by the customer. For outdoor installation a protective housing against rain, snow and sun should be applied. For electrical connection use the internal approved Ex-e junction box.

Attention: Note the explosion proof rules before opening the internal junction box. Cut off the power supply.

A. Supply and Contact

Wires from safety extra low voltage must be separated from others. Only at 24 VAC/DC is supply and signal wires in one cable permitted. All others use separate or double isolated cables. Install overload protection fuse < 10 A.

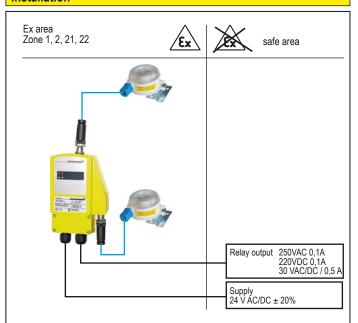

B. Long cabeling

For using long signal wires, shilded cables are recommended. The shield must be connected to the ExBin-... switch inside the terminal box.

C. Separate ground wires

Use for supply and signal wires a separate ground.

Installation

- Do not open covers when circuits alive
- The cable must be installed in a fixed position and protected against mechanical and thermical damage.
- Connect protection earth
- Avoid thermal transfer from sensor to transtucer (ensure max ambient temperature !)
- Ambient temperature -20...+50 °C @ T6
- Close all covers, entries with min IP66
- All transducers are maintenance free.
- Nevertheless maintenace must comply with regional standards, rules and regulations.
- Close after settings all covers and cable entries tight min. IP66.
- For outdoor installation a protective housing against rain, snow and sun should be applied
- For electrical connection use the integrated junction box Ex-e.
