Additional Manufacturing location(s):

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

#### STANDARDS:

The apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

| IEC 60079-0 : 2011  | Explosive atmospheres - Part 0: General requirements                            |
|---------------------|---|
| Edition:6.0         |   |
| IEC 60079-11 : 2011 | Explosive atmospheres - Part 11: Equipment protection by intrinsic safety "i"   |
| Edition:6.0         |   |
| IEC 60079-15 : 2010 | Explosive atmospheres - Part 15: Equipment protection by type of protection "n" |
| Edition:4           |   |

This Certificate does not indicate compliance with electrical safety and performance requirements other than those expressly included in the

Standards listed above.

#### **TEST & ASSESSMENT REPORTS:**

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in

Test Report:

DE/BVS/ExTR09.0037/02

Quality Assessment Report:

DE/BVS/QAR10.0002/13

Certificate No:

IECEx BVS 09.0041X

Date of Issue:

Issue No: 3

Page 3 of 4

Schedule

#### EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

#### Subject and Type

See Annex

#### Description

The switching repeater type 9170 is an associated apparatus per IEC 60079-11 as well as an apparatus per IEC 60079-15. The intrinsically safe circuits are galvanically separated from each other, as from the non I.S. signal circuits and from the auxiliary power supply circuit. Additional variants exist without intrinsically safe circuits.

The Switching repeater receives the binary signals from the intrinsically safe circuits applied to its input and transmits the signal status to the output. The binary signals can be produced by NAMUR proximity switches, contacts, electronic switches, active sensors, etc.

#### Parameters

See Annex

#### SPECIFIC CONDITIONS OF USE: YES as shown below:

For use in Zone 2 the Switching repeater has to be mounted inside an enclosure which is in accordance with the standard IEC 60079-15.

Certificate No:

IECEx BVS 09.0041X

2018-07-25

Date of Issue:

Issue No: 3

Page 4 of 4

DETAILS OF CERTIFICATE CHANGES (for issues 1 and above):

No technical changes; only update of the Test Report

- 2.2.5 Models type 9170/\*\*-\*4-\*\* (Output 1: Terminal: No. 1, 2 Output 2: Terminal: No. 5, 6; (9170/20-\*4-\*\* only))  $U_n = 35 \text{ V DC}$ Nominal Voltage: Nominal Current:  $I_n = 50 \text{ mA}$
- 2.3 Line fault monitoring circuit

(Loop 1; Terminal 8, 9 (-); Loop 2; pac-bus connector V006 / 3, 4) Loop 1 reference to the return of the auxiliary power supply. Loop 2 is galvanically separated from Loop 1. Nominal Voltage:  $U_n = 24 \text{ V DC} (18 \dots 31.2 \text{ V DC})$ Nominal Current:  $I_{n} = 100 \text{ mA}$ 

- 3 Intrinsically safe input circuits, level of protection "ia" The intrinsically safe circuits may also be used in areas endangered by explosive dust atmospheres and be connected to apparatus certified accordingly. For explosive dust atmospheres the maximum allowed values for inductance and capacitance as for gas group IIB apply. (Input 1: Terminal: No. 10 (+), 11 (-); Input 2: Terminal: No. 14 (+), 15 (-))
- 3.1 Models type  $9170/*0-c^*-e^*$ ; with c = 1, 3, 4, 5, 6 and with e = 1, 2

| U。             | = | 10.6 V |
|----------------|---|--------|
| I <sub>o</sub> | = | 24 mA  |

- 24 mA =
- 64 mW (linear characteristic) Po =
- Ci 2.42 nF =
- Li negligible =

The maximum values for inductance or capacitance are shown in the table below.

|    | IIB     | IIC     |
|----|---------|---------|
| Lo | 230 mH  | 63 mH   |
| Co | 16.2 µF | 2.32 µF |

If both input circuits are connected in parallel (Terminal No. 10 - 14 (+) and 11 - 15 (-)) the following values apply to the resulting circuit:

| Uo             | = | 10.6 V                         |
|----------------|---|--------------------------------|
| l <sub>o</sub> | = | 48 mA                          |
| Po             | = | 128 mW (linear characteristic) |
| Ci             | = | 4.84 nF                        |
| Li             | = | negligible                     |
