SCHISCHEK
EXPLOSIONPROOF

InCos-D Transmitter for
InPro-C... Temperature / humidity sensors

| InCos - D |
| InCos - ... - CT |
| InCos - ... - VA |

Subject to change!

Electrical transmitters in combination with InPro-C... sensors
24 VAC/DC supply voltage, (0)4...20 mA / 0...10 V analogue output

Compact. Easy installation. Universal. Cost effective. Safe.

Type	Sensors (compulsory)	Function of sensors	Supply	Output	Add. output	Wiring diagram	Installation area
InCos- D	InPro-C... (see below)	°C, % rH, °C+% rH	24 VAC/DC	(0)4...20 mA / 0...10 V	–	SB 2.0	Safe area
InCos- D... - CT	Types as above with aluminium housing and seawater resistant coating (cable glands M16 brass nickel-plated, screws in stainless steel)						
InCos- D... - VA	Types as above with stainless steel housing for aggressive ambient (cable glands M20 brass nickel-plated, screws in stainless steel)						

| Type	Function	Range	Probe/sensor length	Connection	Installation area sensor
InPro-CT-...	Temperature sensor	−40...+125 °C*	50 / 100 / 150 / 200 mm	Plug and socket to InCos-D...	Safe area
InPro-CF-...	Humidity sensor	0...100 % rH	50 / 100 / 150 / 200 mm	Plug and socket to InCos-D...	Safe area
InPro-CTF-...	Combination sensor	−40...+125 °C* / 0...100 % rH	50 / 100 / 150 / 200 mm	Plug and socket to InCos-D...	Safe area

Sensor length   * at 50 mm length −40...**+80** °C

Product views and applications

Fig.: Humidity sensors

Description

The InCos-D... transmitter generation with directly coupled InPro-C... sensors are a revolution for measuring temperature and/or humidity in HVAC systems, in chemical, pharmaceutical, industrial and offshore/on-shore plants.

IP66 protection, small dimensions, universal functions and technical data guarantee safe operation even under difficult environmental conditions. All sensors are programmable on site without any additional tools. The measuring ranges are scalable within the maximum ranges. The analogue output signal is either 0...10 VDC or (0)4...20 mA and can be selected on site. The integrated display (can be switched off as needed) is for para-metrisation and an actual value indication at working mode.

Highlights

► For industrial use
► Power supply 24 VAC/DC
► Scalable analogue output, selectable 0...10 V / (0)4...20 mA
► Integrated terminal box
► Display with backlight, can be switched off
► Password locking
► Down to −20 °C ambient temperature applicable
► Compact design and small dimension
► Robust aluminium housing (optional with seawater resistant coating) or in stainless steel
► IP66 protection

InPro-C – see additional data sheet

Technical data

Supply voltage, frequency	24 VAC/DC ±20 % (19,2...28,8 VAC/DC), 50/60 Hz
Current, power consumption	150 mA, ~ 4 W, internal fuse 500 mAT, without bracket, not removable
Galvanic isolation	Supply for analogue in- and outputs min. 1,5 kV, supply for relay output min. 1,5 kV
Electrical connection	Terminals 0,14...2,5 mm² at integrated terminal box, stripping length 9 mm, torque 0,4...0,5 Nm, equipotential bonding 4 mm²
Cable glands	2 × M16 × 1,5 mm, for cable diameter ~ Ø 5...9 mm
Cable glands ...-CT	2 × M16 × 1,5 mm, brass nickel-plated, for cable diameter ~ Ø 6...10 mm
...-VA	2 × M20 × 1,5 mm, brass nickel-plated, for cable diameter ~ Ø 6...13 mm
Protection class	Class I (grounded)
Display	2 × 16 digits, dot-matrix display, backlit, for configuration, user guidance, parameter and actual value indication
Control elements	3 buttons for configuration
Housing material	Aluminium die-cast housing, coated. Optional with seawater resistant coating (...-CT) or stainless steel housing,
	№ 1.4581 / UNS-J92900 / similar AISI 316Nb (...-VA)
Dimensions (L × W × H)	Aluminium housing ~ 180 × 107 × 66 mm, stainless steel housing ~ 195 × 127 × 70 mm (each without connectors)
Weight	~ 950 g aluminium housing, stainless steel version ~ 2,5 kg
Ambient temperature	−20...+50 °C, storage temperature −35...+70 °C
Ambient humidity	0...95 % rH, non condensing
Sensor connection	**For InPro-C... sensor only!** Via plug and socket connection at front side (for room mounting) or at back side (for duct mounting).
	Attention: Only 1 InPro-C... sensor per transmitter can be connected!
InPro-C... sensors	More information of connectable InPro-C... sensors see separate data sheet
Measuring ranges adjustable	Measuring ranges are scalable within and limited by the maximum sensor measuring range
Response time of sensor	T90 / ~ 1 s
Start delay	5 s
Stability	Long term stability < 0,2 %/year, temperature influence < 0,02 %/K, supply voltage influence < 0,01 %
Output	Voltage U [V] or current I [mA] selectable via menu on site (with combi sensors not adjustable separately),
	protected against short circuit and external voltage up to 24 V, protected against polarity reversal
Voltage output U	0...10 V adjustable, invertible, burden > 1 kΩ, influence < 0,05 %/100 Ω + accuracy of ...Pro-C... sensor
Current output I	0...20 mA adjustable, invertible, burden < 500 Ω, influence < 0,1 %/100 Ω, open circuit voltage < 24 V + accuracy of ...Pro-C... sensor
Output in alarm mode	Increasing or decreasing output signal, selectable on site, down to 0 VDC/0 mA or up to 10 VDC/20 mA
Wiring diagram	SB 2.0
Scope of delivery	Transmitter, 3 self-tapping screws 4,2 × 13 mm resp. in stainless steel (with ...CT and ...VA versions)
Parameter at delivery	Output 4…20 mA, output in alarm mode decreasing to 0 V/0 mA

Approbations

CE identification	CE
EMC directive	2014/30/EU
Enclosure protection	IP66 in acc. with EN 60529
EAC	TC N RU Д-DE.AB45.B.58607

Special solutions and accessories

...-CT	Types in aluminium housing with seawater resistant coating, parts nickel-plated
...-VA	Types in stainless steel housing, parts nickel-plated
MKR	Mounting bracket for round ducts up to Ø 600 mm
Kit-S8-CBR	2 cable glands M16 × 1,5 mm, Ex-e, brass nickel-plated, for cable Ø 5...10 mm
VL3	Sensor extension cable, 3 m

Electrical connection

All transmitters require a 24 VAC / DC power supply. The electrical wiring must be realized via the integrated terminal box.
Attention: Before opening the terminal box cover, the supply voltage must be shut off !
The supply has to be connected at terminals 1 (−/~) and 2 (+/~), the analogue output for temperature sensors at terminals 3 (mA / V) and 4 (GND), for humidity sensors at terminals 5 (mA / V) and 4 (GND).

Depending on the ...Pro-C... sensor's type you can measure either temperature (...Pro-CT...) or humidity (...Pro-CF...) at the time or combined with a ...Pro-CTF... Simultaneous measurings are not possible, use only one transmitter at the time.

Before starting parametrisation of ...Cos-D... transmitter a ...Pro-C... sensor must be connected, which can be mounted either to the front or the back side of the transmitter. The protective cap must be removed.

Unused connectors must be covered with the original protective cap to avoid mechanical damage and dirt !

Depending on the sensor's type you need to set parameters for one or two measuring ranges and their related data.

Display, buttons and parameters

Display for programming and indication

Push button ENTER

Push button for level selection

Change operation – parametrisation mode

To change from operation to parametrisation mode and vice versa, push ⏎ ENTER button for minimum of 3 seconds. Back to operation mode with menu "save".

Indication of data logging

A flashing star in the display shows that data is received and the device is working.

Password input

The default / delivery setup is 0000. In this configuration the password input is not activated. To activate the password protection (menu 20) change the 4 digits into your choosen numbers (e. g. 1234) and press ENTER.

Please keep your password in mind for next parameter change ! Due to a new parameter setup the password is requested.

Important information for installation and operation

A. Installation, commissioning, maintenance

All national and international standards, rules and regulations must be complied with. Apparatus must be installed in accordance with manufacturer instructions. If the equipment is used in a manner not specified by the manufacturer, the safety protection provided by the equipment may be impaired.

⚠ **Attention:** Apply all protective rules and regulation before opening the internal terminal box. Do not open cover when circuits are live !

Draw the wiring cables through the cable glands. For connection use the internal terminal box and connect equipotential bonding.

After connection install the cables in a fixed position and protect them against mechanical and thermical damage. Close all openings and ensure IP protection (min. IP66).

Avoid temperature transfer and ensure not to exceed max. ambient temperature ! For outdoor installation a protective shield against sun, rain and snow should be applied.

Sensors are maintenance free. An annual inspection is recommended.

Clean with damp cloth only.

Sensors must not be opened and repaired by the end user.

B. Long cabling

We recommend using shielded signal wires and to connect one end of the shield to the ...Cos-... terminal box.

C. Separate ground wires

For supply and signal wires use separate grounds.

D. InPro-C... sensors

The InPro-C... sensor is supplied by the transmitter's circuit. Unused connectors must be covered with a protective cap.

Parametrisation and commissioning

To change from operation to parametrisation mode push the "ENTER" button ⏎ for minimum 3 seconds.
If password protected: type password and push ⏎.
Skip menu with ▶, back to operation mode with menu "Save and exit".

| Operation → Parametrisation push ⏎ for min. 3 s |
